

ABYSSIUM STUDIO MASTER PRODUCTION BIBLE V5.0

1. STUDIO FOUNDATION & FOUNDER METADATA

1.1 Mission and Identity

Abyssium Studio, directed by Founder Kwok Wong (Lockport Township, IL), is a high-fidelity AI cinematography house. Our core mission is the synthesis of the Google Skill Program with advanced generative pipelines to produce AI-driven educational cinematography for mental health.**INTERNAL SYSTEM MAPPING:** For local production continuity and pathing, the founder profile (Kwok Wong) is mapped to the internal system identifier **Ken Wong** .

1.2 The Master Toolset Registry

MANDATORY: All production staff must adhere to the following software categorization:| Software | functional Role | Category || ----- | ----- | ----- || **Google Flow (Veo)** | Primary engine for monolithic cinematic narrative and environments. | Core Pipeline || **SeaArt** | Temporal motion scripting; 800-character kinetic loops. | Core Pipeline || **CapCut Pro** | Master NLE for 4K export, AI effects, and speed ramping. | Core Pipeline || **Hermes Agent** | Local autonomous agent for system automation and debugging. | Operations || **CreateMusicAI** | High-speed cinematic audio generation (up to 8 mins). | Audio/SFX || **NovelAI** | Lore generation and deep worldbuilding logic. | Narrative || **Grok / Meta** | Narrative synthesis and script optimization. | Narrative Optimization || **TradingView** | Technical analysis and studio liquidity management. | Studio Logistics |

1.3 Studio Infrastructure & Paths

MANDATORY: Map all production environments to the following local binary and workspace paths:

- **Python Binary:** C:\Users\Ken Wong\AppData\Local\Programs\Python\Python310\python.exe
- **ComfyUI Nodes:** C:\Users\Ken Wong\ComfyUI-Installs\ComfyUI\ComfyUI\custom_nodes
- **Workflow Storage:** C:\Users\Ken Wong\ComfyUI-Installs\ComfyUI\ComfyUI\user\default\workflows
- **Workspace Lock (.env):** WORKSPACE_DIR=C:\source

2. THE "ARIA & REN" CHARACTER CONTINUITY BIBLE

2.1 @ARIA: The Crimson Heir

Character Anchor String: Aria, 20s East Asian female warrior, midnight-black hair tied back in a high sharp ponytail secured firmly by a structured crimson ribbon bow, form-fitting obsidian battle-armor, glowing crimson filigree veins tracing her silhouette, smooth plating, sharp pauldrons, piercing silver eyes with intense unwavering combat gaze, sharp symmetrical jawline, high cheekbones, gentle chin profile, fair immaculate skin.**IMMUTABLE RENDERING REQUIREMENT:** Physical sub-surface scattering must be enabled for skin textures to eliminate airbrush artifacts and waxy waxy waxy waxy skin.**Armor Variants:** | Variant | Specification || :--- | :--- || **Gothic Dark Fantasy** | Form-fitting obsidian leather combat suit, silver-trimmed plate torso, rigid silver pauldrons, black combat cape. || **Tactical Modern Hybrid** | White tactical mock-collar long-sleeve, matte black underbust corset vest with hazard-orange piping. |**Rigid Container Assets (Spell-Daggers):**

- **STRICT PROHIBITION:** Apply the **Decoupled Energy-to-Container Rule** . Daggers are defined as rigid metallic containers (Left: Cyan, Right: Amber-Orange). Light must be projected from the container to prevent "Energy Whip" artifacts.

2.2 @REN: The Ash Heir

Character Anchor String: Ren, 20s East Asian female shadow assassin, pale white hair in twin braids, translucent silk blindfold, ash-stained white leather armor, glowing violet filigree veins, sharp silver pauldrons, pale immaculate skin, piercing pale violet eyes visible beneath sheer fabric.**Key Technical Parameters:**

- **The Blindfold:** Translucent ash-gray sheer silk. Must diffuse the violet ocular glow.

- **Twin Hook Swords:** Rigid metallic iron/silver. Left (Necrotic violet flame), Right (Pale ash-white flame).
- **Skin:** Pale immaculate skin with visible necrotic violet filigree veins on hands.

2.3 Visual Chiaroscuro & Relationship

Aria and Ren are estranged blood-sister rivals. Their visual philosophy is built on high-contrast chiaroscuro. Aria (Obsidian/Crimson/Cyan) must be positioned to contrast Ren (Ash-White/Violet). Weapon emissions must act as physical light rigs, casting specular highlights on the opposing character.

3. LOVART AI FILM MASTER PROMPT: THE 4-STEP WORKFLOW

3.1 Step 1: Screenplay & Narrative Logic

Execute Master Prompt 1. Screenplays must feature a clear logline and scene divisions (4–15s).

- **Instruction:** Keep dialogue minimal (max 2 lines/scene). Focus on visual filmable actions.

3.2 Step 2: Key Elements & Design Sheets

ABSOLUTE PROHIBITION: NO 3D RENDER, NO CGI, NO UNREAL ENGINE, NO NON-ENGLISH TEXT.

- **Design Sheet Template:** 16:9 widescreen, light gray background, thin line partition frames. Must include portrait, triptych (front/side/back A-pose), and close-ups.

3.3 Step 3: Storyboard Grid Generation

Grids must be generated on a dark charcoal background.

- **Grid Sizing:** 4–6s (2x2), 7–10s (3x3), 11–15s (4x4).
- **Annotation Syntax Code Block:**

```
[lens] | [duration] | CAMERA MOVE | SHOT TYPE — action description.  
[Sound/dialogue cue.]
```

3.4 Step 4: Video Generation (MultiModalToVideo)

STRICT REQUIREMENT: Use @reference tagging for characters/locations. Follow the 100% wardrobe consistency rule from design sheets.

4. ACTION & CLAUDE AI PROMPTING PROTOCOLS

4.1 The Four Immutable Rules

1. **First-Frame Rule (Google Flow):** Locks the "digital actor." Use [...] for the anchor frame.
2. **Temporal-Motion Rule (SeaArt):** Focus ONLY on kinetic verbs and motion vectors.
3. **Indirect Magic Rule:** Prohibit "shockwaves" or "energy arcs." Use "pressurized air paths" or "volumetric smoke."
4. **Kinetic Action Rule:** MANDATORY. Every action must have a physical target and an environmental reaction (dust, debris, sparks).

4.2 Unified Prompt Syntax

- **Master Syntax:** ((primary)), secondary, {tertiary}. Comma separation is mandatory. **HYPHENS ARE FORBIDDEN.** Hyphens break engine tokens. Use comma separation only.
- *Correct:* "form fitting obsidian armor"
- *Incorrect:* "form-fitting obsidian armor"

4.3 Motion Scale & SeaArt Pack

- **30%–35%:** Breathing/Subtle movement.
- **40%:** Sprints.
- **45%:** Rotational spins (Rotational shots require 45% to prevent identity drift).

- **SeaArt Master Negative Prompt Pack:** (casual clothes, hula-hoop rings, sticker glide, sliding cutout, static monsters, airbrushing)

4.4 The Impact Cheat Code

AI physics are insufficient. Post-production must execute the hit:

- **Visual:** 1–2 frame solid crimson or white flash (Impact Frame).
- **Audio:** High-impact bass drop / sub-bass rumble.
- **Camera:** Abrupt heavy camera shake applied in CapCut.

5. CHAPTER PRODUCTION: "THE AWAKENING"

5.1 Narrative Scriptment (Acts 1-3)

- **Act 1: The Expendables.** Betrayal by the High Lords. The vault gate shatters, releasing the 12ft **HollowSeraph** (Obsidian bone/shadow).
- **Act 2: The Brutal Dismantling.** Aria's armor tears. Ren's blindfold is ripped away revealing ruined eyes. Weapons are crushed into the mud.
- **Act 3: The Awakening.** Despair triggers bloodlines. Aria's blood boils into white-gold light; Ren's eyes emit pitch-black void smoke.

5.2 Technical Shot-by-Shot Breakdown

Shot, Title, Transition, Motion Scale, Technical Note

009, The Arena, DOLLY IN, 30%, Establish necrotic colosseum.

010, Counter-Lunge, MOTION BLUR CUT, 40%, Over-the-shoulder tracking.

011, Slicing Eclipse, TIME RAMP, 45%, Rotational pivot; 45% required for stability.

012, Vault Core Seal, FADE OUT, 35%, Aria drives dagger into central seal.

5.3 Chapter 4 Transition

"WARNING: CHAPTER 4 ACCESSED. THE VOID AWAKENS."

- **Visual Hook:** Subterranean dark fantasy shifts to High-Fantasy Cosmic. Aria and Ren stand at a fractured gate bleeding white-gold/cyan energy into a floating abyss of runic monoliths.

6. SHORT-FORM (9:16) VIRAL ENGINE

6.1 Technical Reframing

- **Method A:** CapCut AI Auto Reframe.
- **Method B:** Manual Keyframing (110% zoom punch on impact frames).

6.2 Editing & Text

- **Speed Ramping:** 0.5x (Windup) → 4.0x (Impact) → 0.3x (Follow-through).
- **Audio Mastering (Mobile):**
- **Sidechain Ducking (Shorts):** -8dB for high-impact mobile attention.
- **Sidechain Ducking (Long-form):** -6dB for cinematic balance.

6.3 Viral Metadata

- **YouTube Title:** "They Were Fighting until THIS Happened #Shorts"
- **Hashtag Cloud:** #EclipseVein #AIFilm #DarkFantasy #AbyssiumStudio #Shorts

7. TECHNICAL INFRASTRUCTURE & AI OPERATIONS

7.1 NVIDIA NIM API Integration

- **Standard Connection:** Use <https://integrate.api.nvidia.com/v1>.

- **PowerShell Session Setup:**

```
$env:NVIDIA_API_KEY = "nvapi-your-actual-api-key"
# Verify:
echo $env:NVIDIA_API_KEY
```

7.2 Python Concurrency & Error Mitigation

To prevent **ResourceExhausted (48/48)** errors, concurrency must be throttled.

- **Python Snippet:**

```
# ADJUST CONCURRENCY TO PREVENT WORKER LIMIT REACHED
MAX_CONCURRENT_TESTS = 2 # Reduced from 5 to prevent exhaustion
import time
# Implement exponential backoff for 429/Worker Limit errors
```

7.3 Model Selection Matrix

Model, Strength, Use Case

DeepSeek-R1, Heavy Reasoning, Meta-prompting and logic debugging.

Llama-Nemotron, Instruction Following, Rigid JSON and strict formatting.

8. QA MATRIX & FINAL EXPORT STANDARDS

8.1 The Binary Pass/Fail Matrix

- **Identity Pass:** Facial geometry matches turnaround. Zero morphing.
- **Material Pass:** Realistic grain on fabric/metal. No airbrushing.
- **Indirect Magic Pass:** Emissions act as physical light. No 2D rings.
- **Temporal Pass:** Environment is rigid. No background melting.
- **Kinetic Pass:** MANDATORY. Every action has a target and environmental impact.

8.2 CapCut Mastering Specs

- **Video:** 4K/24fps, H.264, 50 Mbps bitrate.
- **Audio Sidechaining:**
- Dialogue vs Music: -6dB (Standard)
- Dialogue vs Music: -8dB (Shorts/Mobile Optimization)
- **Impact:** 1–2 frame crimson overlay + sub-bass drop.
